

My book is about analyzing malware and detecting it using trained models with Enhanced Machine learning algorithms. Many malware are in the form of virus, trojan horse, worms, adware, spyware etc. Malicious code are detected in portable executable files, suspicious files are detected in segmentation levels. Finally malicious code are detected using permission level. Thus I have detected the problems with enhanced machine learning algorithms. This cyber security concept changes frequently day by day, changes occurs by minutes and seconds. So, this is an ever ending process.

M. Meena Krithika

CYBER SECURITY

MALWARE DETECTION AND CLASSIFICATION USING
ENHANCED MACHINE LEARNING

Dr. M. Meena Krithika, Assistant professor,
Department of Computer Science, Nallamuthu
Gounder Mahalingam college, Pollachi. I'm very glad
to publish this book on behalf of my family. In
future, I wish to publish many books in this title.

M. Meena Krithika
