Abstract

The National Education Policy 2020 is a comprehensive framework that aims to transform the education system in India. This policy presents both challenges and opportunities for higher education institutions in the country. The policy proposes a flexible curriculum structure, increased autonomy, greater emphasis on research and innovation, internationalization, and skill development. While these proposals present opportunities for institutions to innovate, collaborate and offer a student-centered education system, they also pose challenges such as implementation, funding, and faculty development. Higher education institutions in India will need to adapt quickly to the new policies, leverage the opportunities, and overcome the challenges to transform themselves and offer high-quality education to students.

Keywords: *NEP 2020, Higher Education, Flexible Curriculum, Digital Learning, Multidisciplinary Approach.*

Research Gap

The policy has addressed many issues but still there are some gaps that need to be overlooked one such is Implementation at state level , Although the policy has been approved at the state level , it yet to be implemented uniformly across the state level. There is need for research to understand the challenges and opportunities for implementation and to identify the strategies to overcome the challenges. Furthermore it places a strong emphasis on teacher training and development and lack in effectiveness of various teacher programs. It has to be researched to see the employability on the students and teachers.

Introduction

The NEP 2020 presents both challenges and opportunities for these institutions. The policy proposes a flexible curriculum structure, increased autonomy, greater emphasis on research and innovation, internationalization, and skill development. However, the effective implementation of these proposals will require significant investments in infrastructure, faculty development, and training programs. This article explores the challenges and opportunities presented by the NEP 2020 for higher education institutions in India and the implications for the education sector as a whole
